

ALL THE REASONS WHY WE USE GO-LAB

INTRODUCTION

The Go-Lab Initiative arose from the successful project Go-Lab, which lasted from November 2012 to October 2016, and gave the Initiative its name. The aim of the Go-Lab Initiative is to facilitate the use of online laboratories and inquiry learning applications for science education in schools. The Go-Lab Initiative conducts training for teachers all over Europe on the topics of Inquiry-Based Science Education in schools and the use of the Go-Lab Ecosystem. Currently, the Go-Lab Initiative is funded by the Next-Lab project.

AIMS

We want to share our results and students benefits in using Go-Lab. Too many teachers in the world don't know that Go-Lab exist and how to use it. As winners of Next-Lab competition in STEM Discovery Week 2019, we propose our reasons why we use Go-Lab to encourage our colleagues to do the same.

REASONS

We want to share our results and students benefits in using Go-Lab. Too many teachers in the world don't know that Go-Lab exists and how to use it. As winners of Next-Lab competition in STEM Discovery Week 2019, we propose our reasons why we use Go-Lab to encourage our colleagues to do the same.

BENEFITS FOR TEACHERS

Can create different lessons;
Collect data easily and rapidly;
Improve:

- Cooperative learning
- Use of technologies
- Creative learning

Measure students progress
Feedback from students

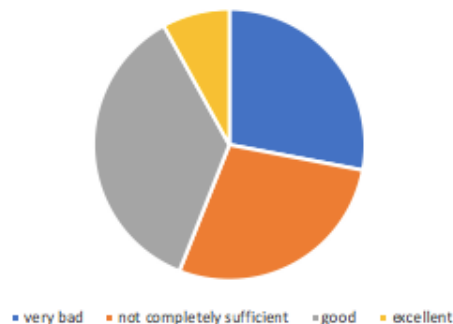

BENEFITS FOR STUDENTS

Become more innovative
Increase motivation
Learn how to learn
Stimulate their curiosity
Manage their own time

RESULTS

Before using Go-Lab

After using Go-Lab
