Lucky8: 100% up to 200€ + 500 free spins for 50€ deposited. 100% up to €200 + 500 free spins. Special Offer. i Claim my bonus. The rules of Crazy Time. The rules and general principle of Crazy Time are pretty simple. This game revolves around a giant wheel that is made up of 54 segments . You place your bets and just hope that the wheel stops on one of the bonuses or numbers that you have chosen. You can place multiple bets during the same game round. Once you have placed your bets, the wheel is spun by the host. Depending on where the wheel stops you will either get a direct win, or a mini game will be triggered to hope to win bigger (Coin Flip , Cash Hunt , Pachinko , Crazy Time). The different symbols of Crazy time. 1, 2, 5 and 10: These are the numbers, the basic symbols. If you land on them, they multiply your bet. Most players, however, prefer playing the mini games symbols and hope for bigger wins. The bonus symbols. Pachinko, Cash Hunt, Coin Flip and Crazy Time : These are the 4 bonus symbols of Crazy Time, which will allow you to get bigger wins than the basic symbols. The multiplier wheel : Two reels that can add a random multiplier on certain sections are launched before each wheel spin. The multiplier on this reel can go up to 100x for even bigger wins. Below is an example of a Pachinko that will be multiplied by 3 during the next spin. Crazy Time: the bonus games / mini games. Pachinko : the host drops a puck (represented here in white) from the top of the wall. It will fall randomly, and go into a box with a multiplier. The multipliers are drawn randomly before the puck starts to fall. In this game if the puck falls on the “double” square then the puck is re-rolled and all multipliers are doubled. This game promises a maximum payout of 10,000 times your bet. Cash Hunt : this game consists in choosing a square among the 108 available objects. Bet multipliers are hiding behind these objects, with a maximum multiplier of 100x. This multiplier can be even bigger if the multiplier wheel fell on the cash hunt. Coin Flip : this is the easiest mini game to get because it is present on 4 segments of the wheel. It is a simple coin flip between two random multipliers (up to 100x). Crazy Time : The last bonus (and not the least) is the Crazy Time. This is the best bonus, which is coveted by all players who play this game of the same name. It is very rare, as it is only present once on the wheel. It is also the game that promises you the biggest possible multipliers. This game takes you to a second, giant bonus wheel consisting of 64 segments. You are asked to choose one of the three available colored arrows. Once you’ve made your choice, the wheel is launched and you can land on a double or even triple slot in addition to the classic multipliers. You can win up to 25,000 times your bet. The maximum possible win on this game is 500,000€. Our final opinion on Crazy Time. Crazy Time is a live casino game available on most online casinos. It is easy to access and very simple to understand. It has a 96.08% Return to Player Rate (RTP). Don’t hesitate to try this famous game to make up your own mind. Crazy Time is not available in demo mode. You will have to deposit money to play it.
