In Crazy Fox, the Spin Wheel is a wheel-like structure as seen in numerous games. When a player taps on it, it spins and provides reward to the player. When the colour of the spin button is red and a player taps on it, it rotates and scrolls up and down and gives shields, coins or more spins. Sometimes players get different types of rewards from spins, because of the ongoing events in the game at that time. What is a shield in Crazy Fox? In Crazy Fox game, Shield is also one kind of reward which players can get by spinning the wheel. One player can get a maximum of 3 shields. In this game, the shield helps the players to defend enemy attacks and protect villages from opponents. The opponents are also human players like you. Your opponents may be of similar levels as you are in or they may be from your Facebook Friend List. They will attack your Village and you have to protect it. Shield will help you in this. If you have 3 shield in your Village, you can remain tension-free, as those will protect your village. The outer shield of your village will break by the attack, but the other two shields will keep the village safe. If you don't have active shields, it will become way easier for your opponents to destroy your village and you will have to reconstruct your Village again. So try to get shields from the spins. What is Raid in Crazy Fox – Big Win? Once a player spins the wheel and consecutively gathers Foxy 3 times, it is called a raid. In this phase, the players can steal other players' coins. A player is provided with 4 options out of which 3 options will provide coins, while the remaining option will offer nothing. So the players should choose the options wisely. Players become eligible to build more villages as soon as they get more coins. What is Attack in Crazy Fox – Big Win? In this game, the attack and the raid just have one difference, otherwise they are almost identical. In an attack a player can attack opponent's village after he/she collects 3 gaming bombs by spinning the wheel, whereas in raid, a player cannot attack but can steal opponent's coins. By your attack you can also avenge any previous attack on your village. What is World Shop in Crazy Fox – Big Win? In Crazy Fox game, the place in which the players are eligible to build their villages is called the World Shop. A player has to complete the village five times as a village has only 5 characters. After building a village successfully, a player is provided a star. The star can also affect the Leaderboard ranking, so it is quite important.
